## **UTDT ADT Tires**

The UTECH UTDT is designed to be a versatile pattern that delivers the performance you are looking for with your articulated dump trucks, loaders and LHDs. It features a deep tread pattern with exceptional traction and excellent cut resistance that makes it well adapted to working conditions in different applications.

### **Parts Details Of UTDT ADT Tires**

Optimized lug and groove design offers powerful traction, extended wear resistance and improved protection on belts:

- The optimized lug angle delivers powerful traction and uniform groove depth provides constant traction throughout the whole life cycle.
- Grooves stone ejectors pushes out the stones trapped in the grooves, and protects the belts from drilling damages.

The large and even contact area offers improved stability and operator comfort.

### Extra impact resistance and load capacity enabled by reinforced tire architecture:

- High tensile steel belt package built in for better impact and puncture resistance.
- The robust casing is designed for higher load capacity, and it makes the tires retreadable, which optimizes tire investment.

### Reinforced tread base and thickened sidewall for better cut and puncture resistance:

- Super thick tread base is applied to increase the puncture resistance.
- The square shoulder design pushes debris aside and protects the sidewall from cuts and damages.

### **Spcifications of UTDT ADT Tires**
