

UTGD Grader Tires

The UTECH UTGD is a grader tire pattern that offers exceptional traction, stability and uptime. It is ideally engineered for high productivity while consuming lower fuel and high productivity in construction.

Parts Details Of UTGD Grader Tires

Tread pattern engineered for excellent lateral traction:

- The specially designed aggressive non-directional tread pattern features large contact area and it delivers excellent lateral traction.

Casing optimized for better endurance and longer life cycle:

- The casing is optimized with even contact distribution that prevents uneven wearing.
- The strengthened casing design and multi-ply steel belts enables maximum resistance to puncture and cuts, and offers retread ability.
- The special shoulder/sidewall intersection design offers improved resistance to cuts and damage.
